<u>APPENDIX B</u>

• Guidelines for writing Learning Outcomes

Leadership constitutes the key factor that leads to the strategic long-term success and the attainment of a strong competitive advantage. The basic aim of the course to provide basic principles, theories and practices that are related to leadership in modern business organizations. Thus, the specific objectives of the course include the provision of theoretical knowledge on general concepts of leadership, the description and detailed examination of the basic leadership theories, as well as the description of contemporary leadership approaches that can be found in modern business organizations. A final aim of the course is to examine special topics that arerelated to leadership and include *inter alia* ethics or emotional intelligence.

More specifically, under the successful completion of the course, students will be able:

- to gain necessary knowledge on the conceptual background of leadership in business organizations (*knowledge*)
- to understand the basic concepts and theories of leadership in business organizations (understanding)
- to get familiar with the different theories on leadership and to be able to evaluate the importance of the various leadership approaches in organizational settings (knowledge and evaluation)
- to apply theories and concepts and evaluate theories' effectiveness in different environments and situations (application and evaluation)
- to understand contemporary leadership issues and to examine the dynamics that are developed among individuals in different business settings (knowledge and analysis)
