

COURSE OUTLINE

(1) GENERAL

SCHOOL	Maritime and Industrial Studies		
ACADEMIC UNIT	Maritime Studies		
LEVEL OF STUDIES	Undergraduate		
COURSE CODE	NAAΓΓ43	SEMESTER	7th semester elective
COURSE TITLE	Shipping Pollution		
INSTRUCTOR'S NAME			
INDEPENDENT TEACHING ACTIVITIES <i>if credits are awarded for separate components of the course, e.g. lectures, laboratory exercises, etc. If the credits are awarded for the whole of the course, give the weekly teaching hours and the total credits</i>		WEEKLY TEACHING HOURS	CREDITS
Lectures		4	6
<i>Add rows if necessary. The organisation of teaching and the teaching methods used are described in detail at (d).</i>			
COURSE TYPE <i>general background, special background, specialised general knowledge, skills development</i>	General background		
PREREQUISITE COURSES:	no		
LANGUAGE OF INSTRUCTION and EXAMINATIONS:	English		
IS THE COURSE OFFERED TO ERASMUS STUDENTS	yes		
COURSE WEBSITE (URL)			

(2) LEARNING OUTCOMES

Learning outcomes <i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i> Consult Appendix A • Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area • Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B • Guidelines for writing Learning Outcomes
Upon successful completion of the course, the students will ✓ Be able to identify the types of marine pollutants. ✓ Understand the need to improve the environmental performance of shipping ✓ Have the skills to evaluate the various options for a smart shipping industry ✓ Know how to apply an environmental port management
General Competences <i>Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?</i> Search for, analysis and synthesis of data and information, Project planning and management with the use of the necessary technology Respect for difference and multiculturalism

<i>Adapting to new situations</i> <i>Decision-making</i> <i>Working independently</i> <i>Team work</i> <i>Working in an international environment</i> <i>Working in an interdisciplinary environment</i> <i>Production of new research ideas</i>	<i>Respect for the natural environment</i> <i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i> <i>Criticism and self-criticism</i> <i>Production of free, creative and inductive thinking</i> <i>Others...</i>
Individual work Teamwork Decision-making Respect for the natural environment Adaptation to new situations Promotion of free, creative, and inductive thinking Work in an interdisciplinary environment Project planning and management	

(3) SYLLABUS

✓ Pollution in general and its sources. Pollution categories. Climate change. ✓ Atmospheric pollution and its effects. The transport sector and air pollution. Carbon footprint of transport means. ✓ Shipping and air pollution. Reduction of CO₂ emitted by ships. SEEMP and EEDI. Lower S fuels. Scrubbers. Techniques for preventing the NO_x formation during combustion. Alternative fuels. Cold ironing. Alternative energy sources. Polar shipping roads. ✓ Oil pollution: major causes and impacts. Major marine oil spills. Fate of marine oil spills. Cleaning up oil spills. Bioremediation. Natural recovery. ✓ Port reception facilities: MARPOL Annex I-VI. The collection of ship wastes. Oily wastes. Sewage. Garbage. Residues of cargo. Hydrocarbons cargo in bulk waste. Chemical cargo in bulk waste. Garbage disposal. Management and treatment of wastes. ✓ Marine biofouling: Effects on unprotected ships. Anti-fouling technologies. Anti-fouling coatings. Biocidal antifouling paints and Biocide-free foul release coatings. Total biofouling removal. Environmental impacts. ✓ Marine pollution from ballast water. IMO ballast water convention. Precautionary practices in BWM. ✓ Hazardous materials within a ship's structure. The Basel Convention. The Hong Kong Convention. EU ship recycling regulation. Green Ship recycling. ✓ The Green Passport. The Green Award. Clean shipping. The future of shipping. Green coastal shipping program. ✓ Seaport environmental priorities. The Sustainable-Green port. Case study of a port using biomonitoring for EMS. Smart port. 1st-5th generation port. Smart port-cities.

(4) TEACHING and LEARNING METHODS - EVALUATION

DELIVERY <i>Face-to-face, Distance learning, etc.</i>	Face to face	
USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY <i>Use of ICT in teaching, laboratory education, communication with students</i>	Use of computers and the Internet. Support of the learning process through the e-class and ms-teams online platforms.	
TEACHING METHODS <i>The manner and methods of teaching are described in detail.</i> <i>Lectures, seminars, laboratory practice, fieldwork, study and analysis of bibliography, tutorials, placements, clinical practice, art workshop, interactive teaching, educational visits, project, essay writing, artistic creativity, etc.</i> <i>The student's study hours for each learning activity are given as well as the hours of non-directed study according to the principles of the ECTS</i>	Activity	Semester workload
	Lectures	52
	Project	40
	Study	58
	Course total	102
STUDENT PERFORMANCE EVALUATION <i>Description of the evaluation procedure</i> <i>Language of evaluation, methods of evaluation, summative or conclusive, multiple choice questionnaires, short-answer questions, open-ended questions, problem solving, written work, essay/report, oral examination, public presentation, laboratory work, clinical examination of patient, art interpretation, other</i> <i>Specifically-defined evaluation criteria are given, and if and where they are accessible to students.</i>	Written final exam (60%) in English. Project preparation, with submission of written report, oral presentation, and examination (40%).
